## RS COMPONENTS SA: INDUSTRIAL SOLUTIONS & ELECTRONIC COMPONENTS

RS Components' humble beginnings began in 1937, initially a radio repair shop with spare parts. As RS Components began growing, they evolved into selling components, and in 1954, they rebranded from Radio Spares Limited to RS Components.

### WHO ARE WE?

RS Components offers customers an unrivalled choice of product technologies solving problems with innovative solutions to various problems. Stocking over 500,000 industrial and electronic products sourced from more than 2,500 leading suppliers, RS Components operates in 32 countries and trades through multiple channels, shipping over 50,000 parcels a day.

### THE FIRST CHOICE FOR ALL STAKEHOLDERS

For years, RS Components have been aspiring towards a more sustainable world through education and innovation and now live by the sole purpose of "Making Amazing Happen". Through stocking a range of products, RS Components supports the engineers of today and tomorrow.

### PARTICIPATING IN YOUTH DEVELOPMENT

Proud of their incredibly talented and diverse workforce around the globe, RS Components sponsors learners through internship programmes. Their commitment lies in actively investing in continuous skills

development to transform South Africa by empowering individuals with the necessary tools and knowledge.

### HELPING LEARNERS SEE THEIR POTENTIAL

The positive outcome from previously sponsored learnerships has helped candidates unleash their potential. RS Components has employed some of these talented learners full-time as valuable assets to the company while helping others to open the doors of opportunity that await them with other companies.

### HELPING LEARNERS WITH A SENSE OF PURPOSE

With the ever-working landscape always changing and the challenges youth face with unemployment, support is essential. RS Components sets an example for other companies by actively engaging with and monitoring through learnership programmes. Giving learners a sense of purpose encourages them to persevere.

### ADDING VALUE TO EMPLOYMENT, JOB CREATION, AND SKILLS DEVELOPMENT

RS Components offers learners the chance to acquire on-the-job skills complemented by theoretical knowledge. This comprehensive approach not only enhances their employability but also equips them with a solid foundation for future employment, career development, and opportunities.
